

## FELIPE SCHERER

*Software Developer*

With more than 2 years of experience in software development, working with frontend, exploring technologies like **React**, **NextJS**, **Tailwind CSS**, **Material UI**, **Angular**, and the essentials: **HTML**, **CSS** and **JavaScript**. I have experience in backend, highlighting my skills in **Node.js** and **Python**. Besides, I already was **project leader**, having **to make decisions** and because of all of that I am always on search for learning and improving my job process.

## PROJECTS

**Blog** ([Project's Link](#)):

- My personal blog where I share my articles about technology, design, game development and much more. There is a searching feature, recommendations and theming.
- Technologies: NextJS, React, TailwindCSS, ContentLayer.

**Neobrutalism Portfolio** ([Project's Link](#))

- Portfolio created in a design called Neobrutalism, usually used on ads, where we have thick borders with pastel colors. Project very nice to improve my abilities in development and design.
- Technologies: NextJS, React, TailwindCSS, Figma.

**RPG Character Sheet** ([Project's Link](#)):

- Project made to play with my friends, my RPG - WHITN. A character sheet having a lot of information about the RPG rules as the attributes and powers. Technologies: Angular, Firebase, RXJS.

**Pokedex** ([Project's Link](#))

- Simple Pokedex but with a lot of necessary information for Pokémon trainers. Project made to learn requests on React and also for learning how to design in Figma.
- Technologies: NextJS, React, TailwindCSS, Figma.
